Multi-Program Discount

The multi program discount is determined by the number of programs joined in the order of their joining. The programs that the multi program discount applies to are: Object Management Group (OMG), Industry IoT Consortium (IIC) and the Digital Twin Consortium (DTC).

For:

- 2 programs, the member organization receives a 5% discount on both programs, the new membership at the time of joining and the 1st membership at the time of renewal.
- 3 programs, the member organization receives a 20% discount on the new membership at the time of joining and continues receiving the 5% discount on the 1st and 2nd memberships at the time of their renewals.

If at any time the member organization cancels out of a program the discount will be reduced to the appropriate discount level at the membership's renewal date(s).
